

Another Sharps Safety Innovation from AMI

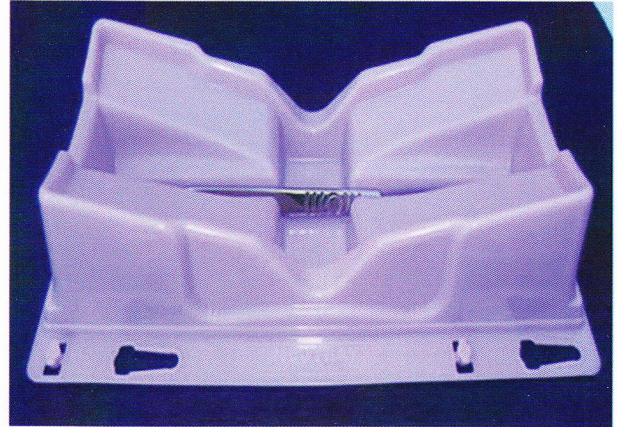

Neutray™ Sharps Passing Tray - A "Neutral Zone" Tray

Pat. Pending & Trade Mark

Hands Free Transfer of Sharps during Surgical Procedure

SAFETY

- All instruments have a specific slot or cavity that they can nestle in while they are being safely passed single handedly & hands free from scrub nurse to surgeon to dramatically reduce sharps injuries

ERGONOMICAL

- Symmetrical for right or left handed person with an ergonomic handle on all 4 sides of the tray

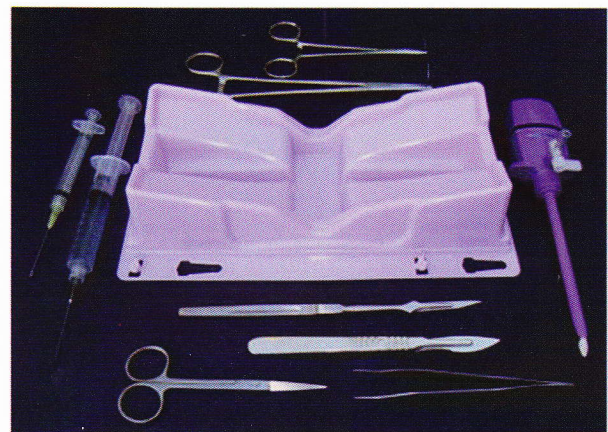

UNIQUE

- Two trays can be interconnected as an option for a single handed-hands free needle exchange program between the scrub nurse and the surgeon

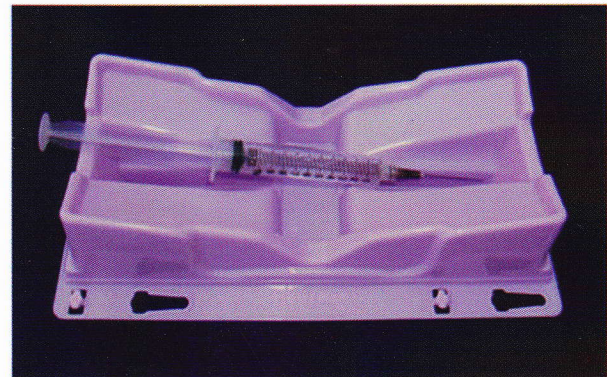

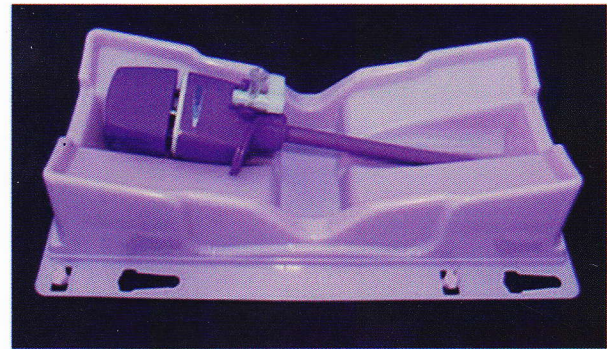

VERSATILE

- Handles virtually all sharps such as: scalpels & blades; needle/needle holders (one size fits all); syringes; sharp instruments (like Iris scissors); K-wires; trocars and others

**ADDITIONAL •
SAFETY**

Unique and lower walled instrument pick-up area in the center and away from the sharp point that protects the practitioner's hands from sharps or contaminated instruments unlike anything else available in the market today
