Advanced Medical Safe Sharps Management

Sharps Safety Station™

The unique, patented Advanced Medical Sharps Safety Station™ range provides the ultimate in sterile sharps organization, counting and disposal of contaminated suture needles, blades and hypodermic needles. This wide range incorporates a number of exceptional safety features which significantly reduce the risk of sharps injuries.

SAFETY.....

Unique needle counter box with three safety hinges and automatic closure snaps. E-Z opening for recount and overlapping side walls for no-gap design. No chance for stored blades and needles to injure the Healthcare practitioner

MORE SAFETY.....

Built-in, one-handed operated, user friendly, scalpel blade remover

MORE SAFETY.....

User-friendly, one-handed operated needle recapper and exchanger

MORE SAFETY.....

Integral Scalpel Shield for safe and simple "Neutral Zone" scalpel storage and retrieval

COST EFFECTIVE

As compared to other individual products

VERSATILE.....

Available in medium and large, shallow and deep box sizes with magnets, foam block, adhesive or foam strips

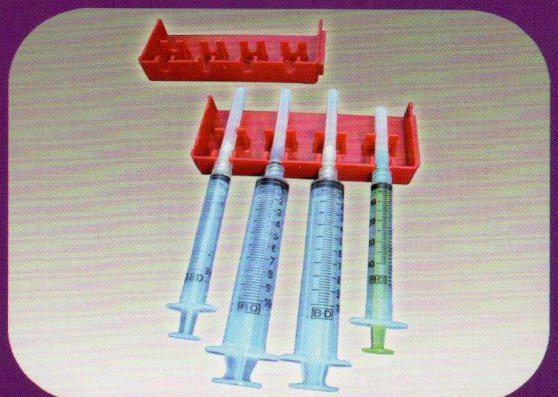

FOAM BLOCK, ADHESIVE

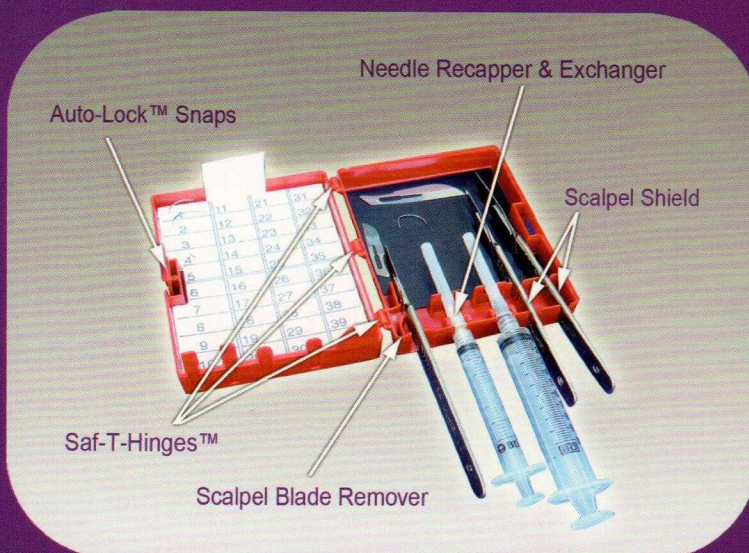

MAGNETIC

FOAM STRIPS

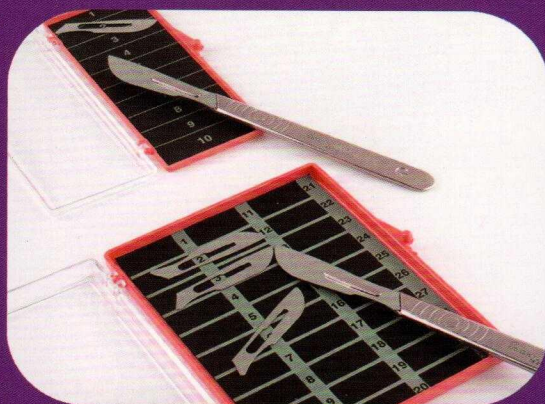

SYRINGE RACK

Syringe recapper and exchanger option available on some models (see last two pages for details)

- From The Innovators In Affordable Surgical Devices

Basic Sharps Counting & Disposal Boxes

A rigid plastic, puncture-proof box for the organization, counting and disposal of contaminated suture needles, blades and hypodermic needles.

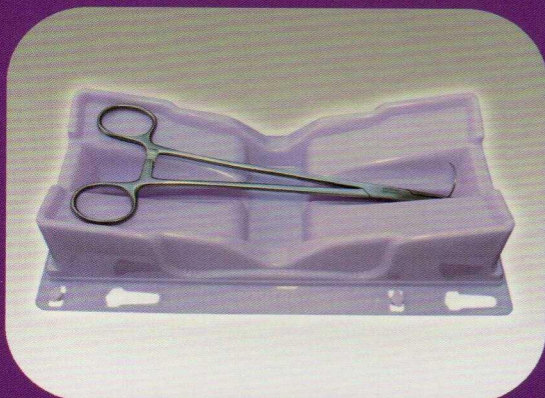

- COST EFFECTIVE** **Single magnet with clear top for extremely competitive pricing**
- VERSATILE** **Various sizes, with standard hinge and locking mechanism with easy opening for recount**
- CLEAR TOP** **Allows convenient sharps visualization and counting**

Scalpel Shield™

A "Neutral-zone" deliberate parking place for safe and secure storage of up to three scalpels in the sterile field. Compact size is ideal for the mayo stand. No more random location for the scalpels which contribute to accidental sharp injuries.

- SAFETY** **Providing a parking place in the "Neutray-zone" in the "upright" position for up to three scalpels ensuring quick, simple, safe placement and retrieval**
- VERSATILE** **Will accommodate any size scalpel in a vertical position. Easy placement and retrieval of all scalpels**
- SECURE** **Adhesive tab secures device in the sterile field**

Neutray™ Sharps Passing Tray

A lightweight, unique and patented single use device that provides a "Neutral-zone" - hands-free and safe transfer of most sharps during surgical and other procedures.

- SAFETY** **All instruments have a specific slot or cavity that they can nest in while they are being safely passed, single handedly, to dramatically reduce sharps injuries**
- ERGONOMICAL** **Symmetrical for right- or left-handed person with ergonomical handles underneath and on all four sides**
- UNIQUE** **Two trays can be interconnected as an option for a single-handed, needle exchange program**
- VERSATILE** **Accommodates all sharps such as: scalpels and blades; needle/needle holders (one size fits all); syringes, sharp instruments like Iris scissors; k-wires; trocars and others**
- ADDITIONAL SAFETY** **Unique, patented lower walled pick-up zone in the center and away from the sharp point, to protect the practitioner's hands from sharps injury**

Educational Sharps Awareness Seminar Available Upon Request

Retractable Saf-T-Scalpel™

Single use retractable safety scalpel featuring a fool-proof design to completely eliminate inadvertent sharps injury from scalpel blades during surgical and other procedures.

- FOOL-PROOF DESIGN..... **Spring loaded for ON-OFF feature; making sure the blade will not be partially exposed and present danger to the staff**
- VERSATILE..... **Weighted for surgeons' preference and non-weighted for all other applications**
- SAFETY..... **Dual retraction push buttons requiring the practitioner's fingers to be away from the blade during blade retraction for added safety**
- SIMPLE TO USE..... **Activation is a simple push with the thumb until tabs latch. Retraction requires pushing the two buttons simultaneously, therefore, there are no accidental retractions**
- STABLE..... **Unique finger stabilizing ribs on both sides (for right- or left-handed person)**
- COLOR CODED..... **Slider color coded and blade number embossed on the rear cap for blade size identification**
- MORE SAFETY..... **Audio-visual click for permanent locking of blade for final disposal**
- SECURE..... **Ribbed, slip-resistant finger grips for secure hold in wet gloved hands**
- SCALE..... **Ruler on one side of the scalpel**

Magnetic Mat

Reusable (autoclavable) surgical magnetic mat with unique reinforcement for safety, security, durability and longevity. Can be utilized as hands-free "Neutral-zone" transfer area.

- SAFE & SECURE..... **Strong magnets prevent instruments from falling off the sterile field**
- RAISED ROUND MAGNETS..... **Makes instruments easier to grasp for removal and protects the silicone rubber from corners of rectangular magnets**
- DURABLE..... **Special fabric reinforcement between layers of silicone for long lasting performance**
- STERILIZABLE..... **Easily cleaned using standard cleaning methods and can be sterilized by either gas or steam**
- STABLE..... **Use a standard towel clamp to securely fasten to the surgical drape**
- VERSATILE..... **One standard size will conform to all surface shapes. Can be cut in half for smaller size**
- ECONOMICAL..... **Competitively priced**

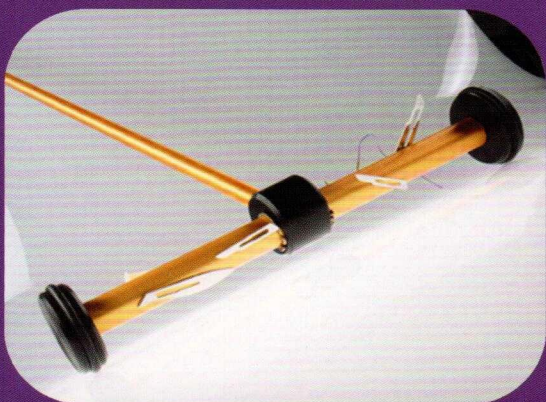

Magnetic Drapes

Disposable, single use magnetic drapes. Available in two sizes. Can be utilized as hands-free "Neutral-zone" transfer area.

- SAFE & SECURE..... **Strong magnets prevent instruments from falling off the sterile field**
- RAISED MAGNETS..... **Makes instruments easier to grasp for removal**
- VERSATILE..... **Available in two sizes, 10" x 16" and 16" x 22" for all surgical procedures**

Advanced Medical Safe Sharps Management

Magnetic Retriever

Magnetic Retriever will retrieve sharps that have fallen from the sterile field onto the O.R. floor.

SAFETY..... **Strong magnetic rollers ensure safer hands-free sharps retrieval**

DURABLE **Solid design ensures a highly cost effective and long lasting device**

ERGONOMIC **Comfortable long handle design enables retrieval while standing**

Sharps Safety Awareness Seminar

The unique Advanced Medical Innovations Sharps Safety Awareness Seminar helps improve sharps safety by raising relevant issues and reinforcing best practice among all operating room and related personnel in a stimulating, informative and enjoyable way. The seminar is discussion based and incorporates the latest published safety data. Upon completion each participant is provided with our "Safe Sharps Management in the Healthcare Environment" booklet and a personalized certificate of attendance.
